ameymwalimbe@gmail.com | 925-621-9646 | Pleasanton, CA | [LinkedIn](#)

SKILLS

- **Languages:** Python, Java, C++
- **Technologies:** Git, Numpy, Pandas, Apache Spark, Sklearn, Tensorflow, React, DynamoDB, JUnit
- **Coursework:** Software Engineering, Data Structures and Algorithms, AI/Machine Learning, Probability, Computer Vision, Mixed/Augmented/Virtual Reality, Computer Security

EDUCATION

University of California, Santa Barbara

Santa Barbara, CA

Masters of Science, Computer Science

September 2024 - June 2025

Bachelors of Science, Computer Science

September 2020 - June 2024

- Cumulative GPA: 3.81
- College of Engineering Honors, Dean's List 2020-2024

WORK EXPERIENCE

Amazon Web Services

Seattle, WA

Software Engineering Intern

June 2024 - Present

- Spearheaded one-click load test campaign for AWS Batch, allowing developers to rapidly stress test and collect data for new features
- Integrated an automated load test approval step into the existing deployment process
- Collected and emitted common metrics (Batch job transition and TPS) during each load test
- Created a DynamoDB table and a comprehensive CloudWatch dashboard to display all collected metrics, providing real-time and historical views of system performance
- Analyzed and reported potential bottlenecks under load, facilitating data-driven optimization and performance tuning

UCSB 4Eyes Lab

Goleta, CA

Computer Vision Researcher

September 2021 - January 2023

- Collaborated with 3 students and authored [research paper](#) on the carryover from the synthetic domain to the real-world domain, presented in Winter Conference on Applications of Computer Vision and published on IEEE Xplore
- Efforts resulted in a 4.4% increase in classification accuracy over the non-depth baseline model on the DIODE Dataset deploying a ResNet50 CNN, retaining 63.8% of the performance boost achieved from training a classifier on RGB and ground truth depth

Amazon

Sunnyvale, CA

Software Engineering Intern

September 2022 - December 2022

- Tracked 6 key FireTV metrics using AWS Cloud Services and visualized data in AWS Quicksight
- Processed millions of FireTV customer data points and constructed relevant datasets in Apache Spark
- Leveraged AWS Cloud Services such as Athena, S3, and Quicksight, and wrote unit test cases
- Scheduled weekly business reports containing 10+ visualizations of engagement datasets to stakeholders
- Initiated migration of AWS Quicksight dashboard visualizations to Apache Superset

PROJECTS

Spatially AwARe

March 2024 - June 2024

- Created mobile app that leverages augmented reality to improve spatial understanding of foreign areas
- Implemented features to let users navigate the world around them without depending on map applications
- Built with Apple MapKit, React Native, Google GeoSpatial API, ARKit

Credit Card Approval Predictor

March 2023 - June 2023

- Multi-Layer Perceptron classifier used to predict risky vs non-risky customers based on Kaggle dataset of 20+ features
- Implemented model that ranked top-25 among classmates in ML course
